

64 ~~64~~ 36
68. A method according to claim ~~41~~ wherein the allocation of logical channels in the uplink and downlink directions comprises reserving a logical channel only in one direction at a time.

65 ~~65~~ 38
70. A method according to claim ~~43~~ wherein the allocation of logical channels in the uplink and downlink directions comprises reserving a logical channel only in one direction at a time.

66 ~~66~~ 53
71. A method according to claim ~~58~~ wherein the allocation of logical channels in the uplink and downlink directions comprises reserving a logical channel only in one direction at a time.

69 ~~69~~ 55
72. A method according to claim ~~60~~ wherein the allocation of logical channels in the uplink and downlink directions comprises reserving a logical channel only in one direction at a time.

68 ~~68~~ 57
73. A method according to claim ~~82~~ wherein the allocation of logical channels in the uplink and downlink directions comprises reserving a logical channel only in one direction at a time.

REMARKS

These dependent claims are added to further distinguish Applicants' invention from the prior art which does not teach or suggest these limitations. There is support for this amendment in the original specification page 12, lines 4-14

(col. 7, lines 55-65 of the granted patent and of this reissue application).

A check for \$108.00 for these six additional dependent claims is enclosed.

It is respectfully submitted that all of the claims now present in the application are clearly novel and patentable over the prior art of record. Accordingly, favorable reconsideration and allowance is respectfully requested.

Respectfully submitted,

David Aker
